REPORT OF MARK M. HADLEY, COLLECTOR OF TAXES.

Amount of taxes committed to me for collection, for the year 1894,		$22,119 29
Amount collected and paid to D. W. C. Newman, town treasurer,		20,840 70
Leaving a balance of uncollected taxes in the hands of the collector,		$1,278 59
Interest on taxes paid town treasurer,	$20 97	

This is the fourth year that the subscriber has attempted to serve the town of Hillsborough as collector of taxes, and he is forced to admit that collecting this year is more difficult than ever before in his experience. While people generally express a desire to pay their taxes and make a commendable effort in that direction, it seems in many cases very difficult for them to do so, hence the collector has exercised his best judgment in extending as much leinency as possible to people in straightened circumstances, without detriment to the interests of the town. Still taxes must be paid in due time or there will be no alternative but a legal course to collect them.

MARK M. HADLEY, Collector.

REPORT OF THE BOARD OF HEALTH.

To the Selectmen and Citizens of Hillsborough:

The Board of Health organized June 12th, 1894, by choosing Brooks K. Webber chairman, and Frank F. Goodwin secretary.

The sanitary condition of the town is steadily improving, and we may congratulate ourselves upon a low death rate during the past year and unusual freedom from epidemics. Most of our citizens are alive to the necessity of securing good drinking water and drainage and the introduction of pond water into a majority of the homes at the Bridge village, and the sewers thus far constructed have had a very satisfactory effect upon the general health of the community.

There have been very few complaints made to the Board and no trouble has been experienced in adjusting such cases as have been reported. But citizens should be prompt and fearless in reporting cases that can be remedied, and should feel that in so doing they are rendering a valuable service to our people. It is the feeling of the Board that the sewer system in our village should be at once pushed to completion and thus remove the last excuse of the neglectful and the greatest menace that still exists to the public health. When this is done the law is plain. We quote it here and trust it will be carefully considered:

"No person shall occupy, lease to any person, or permit any other person to occupy, a building or any part of a building within the compact part of a city or town as a dwelling house, office, store, shop, or sleeping apartment, unless such building shall be provided with suitable privies and vaults properly ventilated and constructed, and kept in proper sanitary condition,

and in case of occupancy as a dwelling house, unless it shall be provided with suitable drains or sewers for conveying the sink water away from the premises into some public sewer, if there is one within one hundred feet thereof, and if not, for conveying it away under ground or in some other way that will not be offensive." Public Statutes, Chap. 107, Sect. 8.

Sewers have already been constructed upon Main Street, to the Rumrill block, Henniker Avenue, and School Street from Main to Myrtle Street, about 100 feet on Myrtle Street, and on portions of Mill, Bridge, Briggs, High and Wyman Streets.

The rules and regulations relating to plans for plumbing and drainage and connecting with public sewer, adopted by the Board Oct. 2, 1893, provide (Section 1) that "Every plumber before doing any work in a building or connecting with public sewer, except in case of repair of leaks, shall give notice to the Board of Health of the proposed work and get permission before any work can be done."

This rule was made in accordance with Chap. 108, Sect. 1, of the Public Statutes. Neglect in complying with this rule subjects the offender to a fine of ten dollars for each offence. Such a rule it is evident is necessary for the protection of the community.

In compliance with the above rule fourteen applications have been filed with the Board for permission to do plumbing in the fire precinct, as follows: Smith & Forbes, Boston, 1; E. H. Randall, Concord, 1; Goodwin & Hoyt, Hillsborough, 12.

During the year the public school buildings in the precinct have been plumbed and connected with the public sewer and the buildings and surroundings are in excellent sanitary condition.

The Board feels it a duty to call the attention of campers and persons residing upon the shores of Loon Pond to the provisions of Chap 108, Sect. 13, of the Public Statutes, which relates to placing any fluid or substance in or near ponds or lakes whose waters are used for domestic purposes, which shall contaminate such waters. The penalty for so doing is a fine

or imprisonment. The Hillsborough Water Company did much the past season toward cleaning up around the outlet of the pond and built a new chamber and placed two additional screens there for filtering the water. Our people may congratulate themselves upon having one of the purest and best supplies of water in the state for domestic purposes.

Three cases of typhoid fever have been reported to the Board during the past year. Of these, one case was fatal.

Respectfully submitted,

BROOKS K. WEBBER,
JOHN GOODELL,
FRANK F. GOODWIN,

Board of Health of Hillsborough.

FINANCIAL CONDITION OF PRECINCT.

Outstanding bonds:

Dated July 1, 1894, 5, 10s, interest at 4 per cent, $6,000 00

The fire department has been called out four times during the year, three times for fires in this village and once for a fire in Deering. The losses in this village have been $150.

The fire department is in good condition and the members of the companies have answered promptly to the several alarms. The companies deserve much credit for their work at the Deering fire, when, in spite of the bad traveling and a fierce wind, they saved much valuable property.

A hose sled, for Winter use, has been added to the apparatus. A new hose carriage, which will carry more hose than the old reel and will be easier managed, is being built and will be ready for use in the Spring. When it is finished, we would recommend that more hose be purchased.

In accordance with the vote passed at the last annual meeting, the sewer has been continued far enough to connect with the school house and a new line built on the easterly side of the river. The remainder of the village is in urgent need of proper sewerage, and we earnestly recommend that a sufficient sum be appropriated at the next annual meeting to complete the system throughout the whole village.

As will be seen by reference to the report of expenditures, no rental for hydrant service was paid for quarter ending March 31st, 1894. In a conference between the representatives of the Hillsboro Water Co. and the Commissioners, it was agreed that in consideration of the lack of water during the Winter of '93 and '94, the Water Co. would make no charge for one quarter's rental, the Precinct paying for the expenses of pumping, making hose connection with pumps of the Hillsboro Woolen Mill, and furnishing an extra night watchman for nine days.

HILLSBORO BRIDGE VILLAGE FIRE PRECINCT.

STATE OF NEW HAMPSHIRE.

To the Inhabitants of the Hillsborough Bridge Village Fire Precinct in the Town of Hillsborough, qualified to vote in Precinct affairs:

You are hereby notified to meet at Odd Fellows' Hall in said precinct on Monday, the Eighteenth day of March, 1895, at seven of the clock in the afternoon, to act upon the following subjects:

1. To choose a Moderator for the ensuing year.

2. To choose three Commissioners, a Treasurer, Clerk, Auditors and other necessary precinct officers for the ensuing year.

3. To hear the reports of the Board of Commissioners, Treasurer, Auditors and other officers and committees heretofore chosen, and to pass any vote relating thereto.

4. To raise such sums of money as may be necessary for paying the current expenses of the precinct, the debts of the precinct and any other necessary charges arising within said precinct.

5. To see if the precinct will vote to raise a sum of money not exceeding nineteen thousand dollars to complete the system of sewerage already begun, or pass any vote in relation thereto.

6. To see if the precinct will vote to issue bonds or notes for any sum of money that may be raised under Article 5, or pass any vote relating thereto.

7. To see if the precinct will vote to purchase the present system of water works or construct a new system, raise any money therefor or pass any vote in relation thereto.

8. To see if the precinct will vote to take any action in relation to a new fire alarm, raise any money therefor or pass any vote relating thereto.

9 To choose Agents or Committees in relation to any subject embraced in the preceding articles.

10. To transact any other business that may legally come before the meeting.

REPORT OF BOARD OF EDUCATION.

SPECIAL SCHOOL DISTRICT, No. 1.

FOR THE YEAR ENDING FEBRUARY 25TH, 1895.

THE SCHOOLS.

The teachers who served last year were retained by the Board for the present year, for the reason that it seemed easier and in many respects better for the schools to correct any defects and faults in their work than to make changes in teachers, which are usually attended with more or less injury, temporarily, at least to the progress of the schools. The teachers have manifested a praiseworthy willingness to carry out any changes suggested by the Board and there have been improvements in nearly if not all the schools, both in the school-room and around the building. We are confident that more work has been accomplished and in a more thorough manner than heretofore. This result is very gratifying to the Board and we hope will be satisfactory to the parents and guardians of the pupils. The alterations and improvements authorized by the district at the last annual meeting and which were carried into effect during the summer vacation, have assisted materially in bringing about these desirable results. But there is still opportunity for further improvement in the efficiency of the schools without additional outlay upon the buildings. It seems necessary, however, to organize another school for a part of the intermediate grades, at the commencement of the Spring term.

The ordinary school expenses for one year and ten days ending Feb. 25th, were $390.40, of which $265.48 were expended for fuel alone, $25.00 for water rent, and the balance, $99.92, for incidental expenses. The salaries of the teachers and janitor paid during the time stated above were as follows:

Isaac Copp,	$844 47
Ada H. Buxton,	333 00
F. Gertrude Manahan,	333 00
Edna E. Copp,	316 00
Annie M. Critchett,	342 00
B. E. Newman,	144 00
A. C. Hoyt, janitor,	148 35
	$2,463 22

The total expense of the schools for the term of one year and ten days foots up $2,851.62.

THE BASEMENT.

At the annual meeting held March 14, 1894, the district voted that the sum of $1000 be raised for the purpose of making alterations and improvements in the basement of the school buildings and carrying water to every school room. Plans had been outlined and estimates made to the building committee previous to the meeting. At the completion of the Spring term of school the work was commenced and carried forward under the supervision of R. Childs of the building committee. The work was done in a thorough and substantial manner, with an eye to economy as well as convenience. But there were many conditions that became manifest as the work advanced that were unforeseen when the estimates were made, and hence the appropriation was not sufficient to cover the cost. The entire outlay for the basement improvements, carrying water to the school rooms and connecting with the sewer was $1,437.75, exceeding the appropriation $437.75. To avoid expense and other inconveniences this amount was temporarily borrowed from the current school money in the treasury and all bills have been paid. Some action however must be taken at the coming

annual meeting to enable the School Board to replace this money in the school treasury. The sanitary condition of the buildings is now first-class and in matters of convenience they are surpassed by few if any.

THE LABORATORY.

At the annual meeting, March 14, 1894, the Board of Education was instructed by vote of the district to fit up the room in the third story of the new building for a laboratory for the use of the high school and to purchase such books of reference and apparatus as might be necessary, and it was recommended that the money for this purpose be drawn from the Marion A. Moore Fund. At the close of the Spring term this work was also commenced under the direction of the Board and pushed forward as rapidly as circumstances would allow the work to be done economically. It was completed and supplied with apparatus in time for use in the Winter term just closing. The total expenditure was $689.90, of which substantially $100 was paid for apparatus. The laboratory, though not so large as some, is one of the best in the State in construction and appointments. There is still remaining of the Marion A. Moore Fund in the Hillsborough Guaranty Savings Bank, $389.50.

Respectfully submitted,

WALTER S. SCRUTON,
MARK M. HADLEY,

REPORT OF THE BOARD OF EDUCATION.

TOWN DISTRICT.

There have been 247 weeks of school the past year. The average daily attendance was 139. The whole number of scholars who have attended two or more weeks was 182: 87 being boys, and 95 were girls.

The number of visits by parents, citizens and others was 779. The schools have been under the instruction of female teachers, and we think the progress made is very commendable, although it could not be expected they would give perfect satisfaction to all.

The register shows that of those who have visited the schools only five have been gentlemen who have had scholars attending school the past year.

Fellow townsmen, is this the way to encourage the young in acquiring an education? Is that the usual way that other affairs are conducted? Nearly every one in town can find time to attend an election or the annual fair! Why not, then, devote one half day at least, and gladden the hearts of the young by attendance at the examination of your own school if you cannot spare time for any other.

A change has been made in mathematics and grammar with the best results. We think no other change will be needed the ensuing year.

Nearly all of our teachers have been faithful and competent, trying by example and the feeling of responsibility to elevate the standard of moral, as well as intellectual training.

There is one type of teacher with whom we have to deal, who has but one object in view—her salary at the end of the term. When a school is afflicted with such an imposter, the loss to the school can scarcely be estimated. There is so much independent power vested in a teacher, there being no direct supervisor, no special employer to guard the details of her work, that if she has the disposition to shirk her duties she can do so to a great extent, and still keep up an apparently good form of of school work. She can go through the formula of asking questions from the book and receiving the memorized answers, but when it comes to that wearying task of expounding principles to pupils slow of understanding, teaching penmanship to awkward little hands and exercising that much needed patience with scholars of dull intellects, the poor, indifferent teacher simply does none of these. She skims over the surface and leaves the pupil to the choice of groping alone through the problems, or dismissing them, unmastered. Such teachers are directly responsible for a great deal of the incompetency of life. Many a man, from having poor instruction in arithmetic and penmanship in school, has struggled at a disadvantrge all through his business career.

But the good teacher—the teacher with a conscience—let us turn to her. She is stimulated by something higher than dollars. She feels the responsibility of her position. She knows she is the fountain head from which the pupils under her charge must draw their intellectual growth, and knowing this she fortifies herself with a conscientious patience for her work. She makes a study of each child's mind that she may be able to give the special individual help that is necessary. She probes into the pupils' understandings to see if they comprehend the case in hand. She does not skip or slip over principles that are difficult of explanation because it requires a tedious exertion on her part. She gives the best of her energies earnestly and ardently to her labors. Heaven bless such a teacher.

Much of the apparent lack of qualifications which make a good teacher is caused directly by parents and others who

discuss school matters in stores, blacksmith shops etc., telling scholars what to do and how to do it, and ninety-nine cases out of one hundred not visiting a school at all and knowing nothing of the school or its work. Some of the parents in divisions 10 and 17 have caused us some trouble in the matter of compulsitory attendance. They will send their children the twelve weeks required by law and thereafter keep them at home the rest of the school year, thinking they are getting the best of the Board of Education. These parents should think of the injustice to their children. We hope, for the sake of the future of our good state, that the legislature now in session may change this part of the school law, from twelve to twenty-four weeks attendance for the year.

On the other hand we have received many cheering words of approval from parents who believe we are doing the best we can under existing circumstances, for a higher standard in school work, for which we feel very grateful. Attention is called to the article in the warrant, to see if the district will reduce the number of its divisions. The board would like the co-operation of the district in this matter, which has never been discussed as it should have been, and we think the matter could be satisfactorily arranged.

FRANK J. BICKFORD,
JOHN W. JACKMAN,
ALDEN P. FARRAR,
